NR.196/17.01.2025

Process verbal

Privind constatarea existenței rețelei de apă  
de pe raza localității Bucovăț

În perioada 10.01.2025 – 17.01.2025, Comisia de inventariere a domeniului public s-a întrunit în conformitate cu dispozițiile legale în vigoare, în vederea identificării și constatării în teren a rețelei de alimentare cu apă executate în perioada 1995–1996 de către Unitatea Administrativ-Teritorială Remetea Mare, din care, până în anul 2008, făceau parte și localitățile Bucovăț și Bazoșu Nou.

Această lucrare publică este prezentă pe teritoriul actual al UAT Bucovăț, însă nu există documentație tehnică oficială predată de către UAT Remetea Mare la momentul separării administrative.

Pentru validarea existenței rețelei de alimentare cu apă, comisia a efectuat investigații în teren, constând în **executarea de săpături în 12 puncte distincte** de-a lungul traseului presupus al conductei. În toate cele 12 puncte de săpătură s-a constatat prezența conductei de apă, realizată din material tip PVCU, cu diametrul de 90 mm.

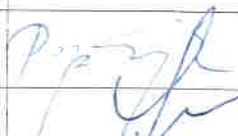

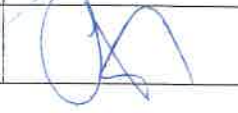

De asemenea, au fost identificate capetele conductei, acestea fiind reprezentate de cișmele stradale amplasate la o distanță estimată de aproximativ 4–5 metri liniari față de traseul conductei principale. Ulterior, comisia a procedat la determinarea lungimii rețelei de apă pe fiecare stradă unde au fost realizate săpături, în vederea actualizării inventarului domeniului public.

Rezultatele măsurătorilor efectuate vor fi detaliate în anexa 1 iar în anexa 2 este reprezentarea grafică aproximativă (conducta nefiind dezgropată pe toată lungimea ei) a traseului conductei la prezentul proces-verbal, cu indicarea lungimii rețelei pentru fiecare segment de stradă investigat.
